

FX Rental

FX Rental Mobile View

FX Rental is a fit-for-purpose module that provides a seamless experience from the warehouse to the field to the back office, capturing asset and consumable data throughout the rental lifecycle.

Asset Management

FX Rental allows companies to have full visibility into the availability and location of assets. It also stores data related to recent transfers and maintenance.

Centralized Data

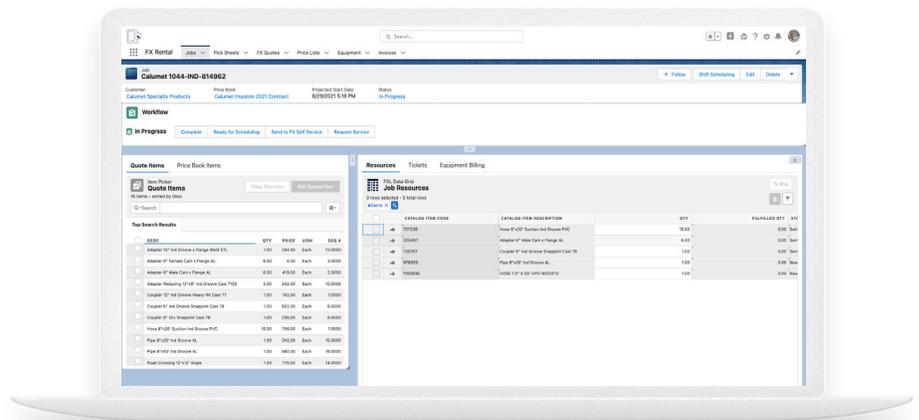

From job planners, to repair technicians, and warehouse managers, there are many personas involved throughout the rental process. Each of these roles need access to data provided by their counterparts. FX Rental allows for a single source of truth, housing the asset data and making it available for all parties involved.

Rental Lifecycle

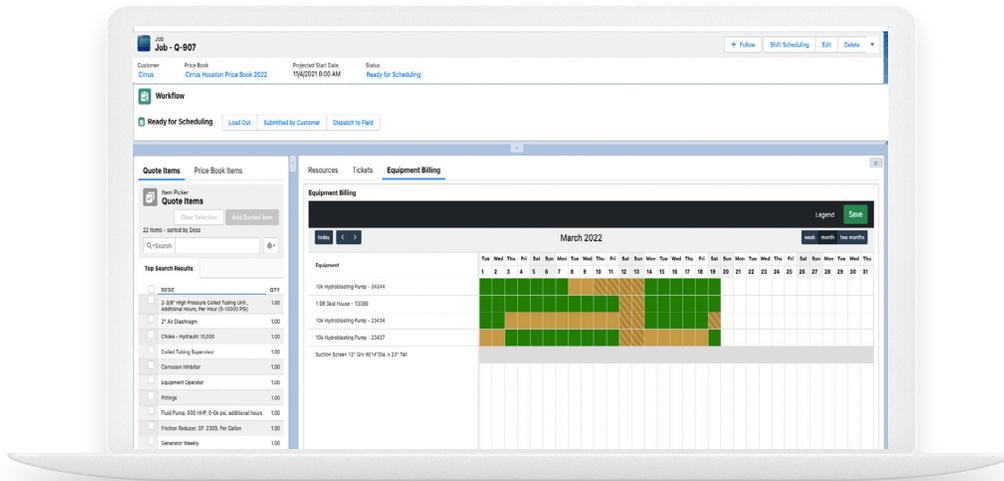

Job Resources: This feature allows you to track items that have been requested for a job, such as picked quantity, reserve quantity, current fulfillment, as well as delivered and returned quantity.

Pick Shet Builder: Build pick sheets for the items that need to be selected in the warehouse. Plan for future jobs and save pick sheets weeks out or send pick sheets to the warehouse right away.

FX Rental Job Resources View

FX Rental Equipment Billing View

Pick Sheets: Pick sheets can be viewed on a laptop, tablet, or phone. View serialized and stock items to be picked and the job they are for, scan barcodes for quick selection, and update warehouse quantities in real time as items are added to the pick sheet. Once items are selected and staged, create a delivery ticket right from the pick sheet itself.

Equipment Billing: As items are delivered and put on rent, the Equipment Billing screen allows users to update the rental status of each asset. Colored coded statuses of on rent, off rent and standby, segmented by day, deliver a synopsis of all rental equipment in a glance.

Reporting: By collecting data in FieldFX and FX Rental, the data becomes centralized and actionable. Create reports such as: assets on location, profit margin, utilization, upcoming deliveries, returns, pending order, outstanding. Report by job, by region or even globally to run the business more strategically.

About ServiceMax

ServiceMax's mission is to help customers keep the world running with asset-centric field service management software. As the recognized leader in this space, ServiceMax's mobile apps and cloud-based software provide a complete view of assets to field service teams. By optimizing field service operations, customers across all industries can better manage the complexities of service, support faster growth and run more profitable, outcome-centric businesses.
