You have invested in ServiceMax Asset 360 to accelerate your digital transformation journey, meet the growing need for asset-centric functionality and increase service profitability, asset visibility and agility. Now, you want your investment to pay off quickly and successfully.

The ServiceMax Spark 360 Professional Services package provides you with key functionality through a fixed-scope approach, designed for fast implementation and rapid time to value.

By providing you with prescribed processes and built-in best-practice workflows, ServiceMax Spark helps you implement ServiceMax Asset 360 efficiently. You also get capabilities that are exclusively available to Spark 360 customers:

- Asset Hierarchy Management (move, swap, clone, update)
- Location Management
- Asset Uptime & Downtime Capabilities & Reporting
- Automated Maintenance Work from Asset or Contract
- Work Order Assignment Management

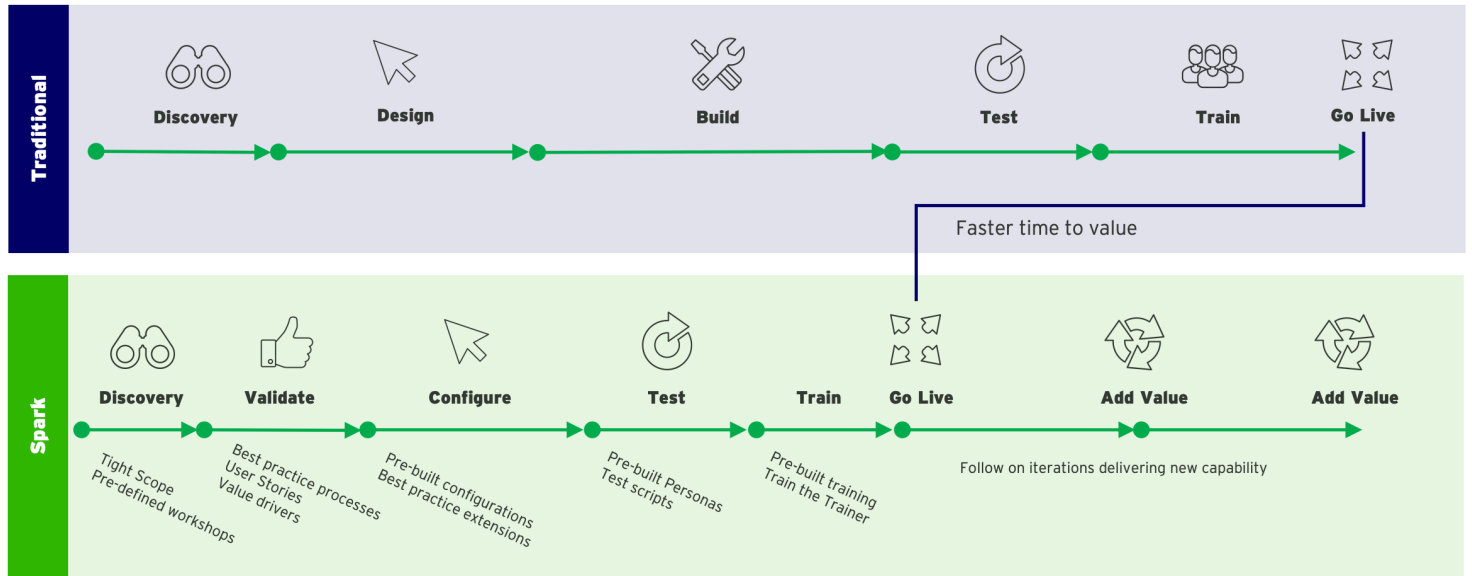

Plus, this package also includes several tools that will make life easier for your administrator.

As your service organization matures, you'll be able to smoothly implement additional Asset 360 features and functionality.

“ServiceMax has some of the deepest functionality for commercial providers of complex, equipment-centric services. An indicator of this strength is the firm traction of Asset 360, a product authored by ServiceMax and co-funded by Salesforce and ServiceMax, that adds warranty, RMA and process flow management functionality (among other features) to Salesforce Field Service.”

Jim Robinson, Naved Rashid, Gartner, Inc., Magic Quadrant for Field Service Management, 31 August 2021

Accelerated value delivery

What you get with ServiceMax Spark 360

ServiceMax Spark gives you what you need to quickly transform your field service operations and reap the benefits of increased service profitability, asset visibility and agility. With Spark 360, you will have access to all the project leadership, expertise, and services you need to successfully go live with ServiceMax Asset 360 - quickly, cost effectively and risk free.

Using the proven success of the MaxApproach methodology, a team of accredited field service and ServiceMax experts will partner with you to assess and standardize your business processes and align them with ServiceMax functionality. The team of experts will then use an extensive toolset that includes defined process flows, and a preconfigured setup that can be tailored to match your unique business requirements to bring your organization online with Asset 360.

The fixed scope of Spark includes best practice and core business functions of Asset 360. With this functionality, you can:

- Better manage your installed base with Asset Hierarchy and Timeline
- Manage, track and enforce warranty and service contract entitlements against your installed base
- Effectively create and apply new maintenance plans and service contracts with a templated approach

- Utilize end-to-end business process flows using Asset 360's best-practice approach
- Leverage prebuilt dashboards, reports, and preconfigured Service Metrics such as Asset Downtime and Uptime

With ServiceMax Spark 360, you also get access to ServiceMax Support resources, our user community, and web-based training for your service professionals.

About ServiceMax

ServiceMax's mission is to help customers keep the world running with asset-centric field service management software. As the recognized leader in this space, ServiceMax's mobile apps and cloud-based software provides a complete view of assets to field service teams. By optimizing field service operations, industries with high value, complex, mission-critical equipment can support faster growth and run more profitable, outcome-centric businesses.
